Results of the ixCrypto Index Quarterly Review (2021 Q2)

Today, IX Asia Indexes Company Limited announced the 2nd quarter review of the ixCrypto Index (“IXCI”). This is the first crypto benchmark index launched in Hong Kong.

There are three constituents’ additions and no deletion. The number of the constituent cryptos will increase from 8 to 11 after the changes. The additions are as follows:

Additions: Dogecoin, Solana, VeChain

The free float adjusted market capitalization coverage is 75.33%, while the 90-day-average volume coverage is 80.06%. The constituents change and recapping at 40% will be effective on July 16, 2021 (Friday).

Since the last review, there has been a drop in the crypto total market capitalisation from USD1.88tn to USD1.42tn (-24.5%), and a fall in the daily volume from USD131bn to USD93bn (-29%). Bitcoin remains as the largest crypto in the constituent list, but its price has gone down by 39% since the last review.

“We are pleased to see the development of the ixCrypto index becoming more mature since its launch in 2018. With 11 constituents after the effective date, the index is becoming more diversified. The committee will continue to review the market development and may consider including more constituents in the coming review to bring the market capitalisation coverage back to the 80% line,” said Irene Wong, Chairman of IX Asia Indexes Advisory Committee.
